EDUCATION

Kwame Nkrumah University of Science and Technology (KNUST)

Program: BSc. Computer Science | Expected Sept 2026 **Academic Standing:** Second Class Honours (60.00%)

Relevant Courses: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Software Engineering, Artificial Intelligence, Web Development.

PROJECTS / ACHIEVEMENTS / AWARDS

- **AidFidelis** - Developed an AI-powered health symptom checker and e-pharmacy platform integrating PyTorch machine learning models, Google Gemini API, Fast API, and Firebase for real-time predictions and data management.
- **De Wrap Square** - Engineered a dynamic e-commerce web application for a local pizza shop using HTML, CSS, and Java Script, featuring an intuitive online menu and order handling system.
- **Equal Pay** - Built an interactive bill and tip-splitting web application utilizing HTML, CSS, and JavaScript, incorporating mobile money validation concepts for seamless group expense management.
- **Lega Lens** - Designed a contract analysis web application that leverages AI integration to automatically review legal documents and identify unfavorable clauses.
- **Ding Talk Clone** - Served as the primary front-end developer for a project replicating the core user interface and functional layout of the Ding Talk application.

WORK EXPERIENCE

Front-end Developer Intern, Nerasol Ghana - Roman Ridge

- Collaborated with the development team to build responsive, user-friendly web interfaces and optimize application performance.
- Translated design wireframes into clean, maintainable, and scalable front-end code using modern web technologies.
- Participated in debugging, cross-browser testing, and refining the user experience.

IT Support Intern, University of Ghana Medical Centre (UGMC) - Legon

- Provided technical support and managed network troubleshooting across the medical facility.
- Assisted in maintaining and optimizing the hospital's IT infrastructure to ensure seamless daily operations.
- Configured hardware and software systems for hospital staff and addressed technical ticketing requests.

LEADERSHIP EXPERIENCE

- **Student Organizer, KNUST Computer Science Department** - Drafted executive communiques and coordinated organization for the final-year academic field trip.
- **Project Lead, AidFidelis Development -** Managed the end-to-end software development lifecycle, from system documentation to the final presentation of the AI-integrated health platform.
- **Assistant Head Boy, Pride of the East International School -** Mentored students and assisted the administration in maintaining school regulations and organizing daily activities.
- **House Prefect, Seven Great Princess Academy** - Managed student welfare and maintained discipline within the assigned residential house.
- **Entertainment Prefect, Seven Great Princess Academy -** Coordinated school wide social events, creative programs, and extracurricular activities.

SKILLS AND INTERESTS

- **Programming:** JavaScript, Python, Java, C++, HTML, CSS, SQL
- **Frameworks & Libraries:** React, Tailwind CSS, Fast API
- **Databases:** Firebase
- **Tools:** Git, GitHub, Visual Studio Code
- **Workflow / Superpower:** Vibe Coder
- **Interests:** UI/UX design, AI integration in web applications, music production (creating audio loops/drumming).
